Binomial name

*Mus musculus*

#### Subspecies

Common name: House mouse

Scientific Name: *Mus musculus*

Length: 175mm (6.8in)

Color: Brownish grey with grey abdomen

Some other features:

The tail is about 90mm, dark in color and slightly longer than the body. Have four on front feet and five on back feet. The ears are large with some hair. The droppings are rod or spindle shaped.

### Diseases transmissions

Most rodents including the house mouse carry serious diseases which can be transmitted to human beings. They also carry parasites.

### Rodent control programs

Our company uses integrated control programs in combination with ministry of environment approved rodenticides in baiting stations to control mice.

### Food preference

The house mouse will eat any food but prefer grains. Most garbage foods attract them.

### Professional removal

Consult SPC for professional help. We have everything it takes to control these unwanted visitors to your home and business in a courteous and professional manner.

Please call SPCP to send professional exterminators for control, we will be happy to help you!
